VG

EDGE MASTER

Fast and precise deburring and edge rounding of cut sheet metal.

Economical, with a focus on essential features and a working width of 1,060 mm.

EDGE MASTER

Entry-level **without compromise**

A budget-friendly entry-level model with the features you need. With a working width of 1,060 mm, the machine combines deburring, edge rounding and laser oxide removal in a single pass.

Multiple operations in a single pass

Deburring, edge rounding and laser oxide removal

- Edge rounding
- Laser oxide removal
- Deburring
- Controlled roughness
- Polishing
- Finishing - straight grain finish

Grinding unit

Targeted grinding of hard burrs without damaging the workpiece surface. Depth and pressure are set manually.

Quick grinding belt change, with pneumatic belt tensioning.

Top brush system

Two rows of oscillating top brushes round all outer edges and inner contours evenly. The long stroke covers the full working width. For small parts: the short stroke or the position for small parts.

Speed, height and pressure are set per brush row.

Different brush combinations are possible (2 + 2).

Controls

Touchscreen controls for the grinding belt, top brushes, oscillation and conveyor belt, with separate speed control for each function. Work programmes can be saved.

FEATURES	**EDGE MASTER**
Working width	1,060 mm
Motorised height adjustment	0.8 – 100 mm
Conveyor belt speed	0.5 – 6 m/min
Grinding belt dimensions	1,060 × 1,900 mm
Diameter top brushes	250 mm
Dimensions	2,640 × 1,905 × 2,040 mm

VG MACHINES

MADE IN BELGIUM

VG Machines develops and builds deburring machines based on decades of expertise in deburring and finishing cut sheet metal parts.

Designed and manufactured in Belgium since 1950.

Personal service, technical training and our own expertise centre form the foundation of our approach.

Our focus is on technology, innovation and ergonomics.

Find out what a deburring machine can save you.
We are happy to discuss your application with you.
